SUMMARY

MERN Stack Developer who built and deployed three full-stack projects: an **AI chat app** containerized with **Docker** and **Kubernetes manifests**, an e-commerce web app with role-based access, and an Airbnb-style listing app with a **test-gated GitHub Actions pipeline**. Focused on secure authentication, clean API design, and reliable deployments.

TECHNICAL SKILLS

Proficient : JavaScript (ES6+), React.js, Node.js, Express.js, MongoDB, REST APIs, JWT Auth, Git/GitHub, HTML5, CSS3

Hands-on : Docker, Kubernetes (manifests), NGINX Ingress, GitHub Actions, Jest, Tailwind CSS, Bootstrap, Material UI, TanStack Query, Mongoose ODM, Joi, Cloudinary

Familiar : SQL, Java (DSA), Render, Vercel, Netlify, MapBox API, Multer, Formik, Nodemailer, EJS

PROJECTS

AI Assistant (ChatGPT-Clone) | *React, Express, MongoDB, Docker, Kubernetes* Mar 2026 – May 2026

- [Live Demo](#) · [GitHub](#)
- Built a full-stack AI chat app with **JWT auth**, per-user conversation threads, markdown-rendered replies, and **conversation context**.
- Containerized frontend (multi-stage Nginx build) and backend with **Docker**; wrote **Kubernetes Deployments, Services, Secrets, and NGINX Ingress** manifests with path-based routing and ran them on a local cluster. Public demo on Render and Netlify Functions.
- Set up **GitHub Actions** to build and push both images to Docker Hub on every push to **main**.

Boutique (E-Commerce Web App) | *React, Express, MongoDB, MUI, Cloudinary* Jan 2026 – Mar 2026

- [Live Demo](#) · [GitHub](#)
- Developed a full-stack store with product catalog, server-persisted cart, reviews, profiles, and **admin/user roles**; admin-only product management enforced on both API and UI.
- Built the auth flow: **JWT, bcrypt hashing, OTP password reset via Nodemailer** (hashed OTP, 5-minute expiry), and **server-side token blacklisting** on logout. Hardened the API with Helmet and rate limiting on auth routes.
- Implemented **signed direct-to-Cloudinary uploads** with server-side ownership checks; improved frontend performance with React.lazy code splitting, split contexts, and React Query caching.

Wanderlust (Property Listing App) | *Node.js, Express, EJS, MongoDB, MapBox, Jest* Aug 2025

- [Live Demo](#) · [GitHub](#)
- Built an Airbnb-style listing app with full CRUD, MapBox geocoding and maps, Cloudinary image upload, Joi validation, and bcrypt + MongoDB-backed sessions with owner-only authorization, following MVC structure.
- Implemented a **test-gated CI/CD pipeline**: GitHub Actions runs Jest and Supertest tests against a MongoDB service container, and only passing builds are deployed to Vercel via the CLI.

KEY ACHIEVEMENTS

Deployed **3 full-stack apps** on Render, Vercel, and Netlify; containerized one with Docker and Kubernetes manifests. Applied security practices across projects: bcrypt password hashing, JWT and session auth, role-based access control, rate limiting, and secrets kept in environment variables / Kubernetes Secrets.

Solved **150+ DSA problems** in Java to build a strong algorithmic problem-solving foundation.

EDUCATION

Master of Computer Applications (MCA) 2025 – Present
Shri Khushal Das University, Hanumangarh CGPA: 7.37 / 10

Bachelor of Computer Applications (BCA) 2022 – 2025
Shri Khushal Das University, Hanumangarh, Rajasthan
