SUMMARY

Motivated Full Stack (MERN) Developer with hands-on experience designing and deploying production-ready web applications. Proficient in React.js, Node.js, Express.js, and MongoDB with practical knowledge of REST API development, JWT authentication, cloud media storage, and responsive UI design. Seeking a software engineering role to build scalable, user-centric products at a high-impact technology company.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), HTML5, CSS3, SQL

Frontend: React.js, Bootstrap, Tailwind CSS, Material UI, Formik, EJS

Backend: Node.js, Express.js, REST API Design, JWT Authentication

Databases: MongoDB, Mongoose ODM, SQL

Cloud & DevOps: Cloudinary (media storage), Render (deployment), Git, GitHub

Tools: VS Code, Postman, Terminal, MapBox API, Multer

Concepts: MVC Architecture, CRUD Operations, Responsive Web Design, Session Management

PROJECTS

Boutique Website | React.js, Node.js, Express.js, MongoDB, JWT, Cloudinary, Multer, Material UI Jan 2026 – Present

- Built a production-deployed full-stack e-commerce platform for boutique retail with 5+ core modules including user authentication, product management, cart, and customer reviews.
- Implemented secure JWT-based authentication with profile management, password reset via email flow, and session handling — reducing unauthorized access risk.
- Integrated Cloudinary for scalable image uploads and storage, enabling dynamic product media management without server-side file bloat.
- Engineered a multi-component cart system with real-time state updates using React.js and form validation via Formik, improving checkout reliability.
- Deployed frontend and backend independently on Render; Live Demo | GitHub

Wanderlust | Node.js, Express.js, EJS, MongoDB, Mongoose, MapBox, Multer Aug 2025

- Developed a full-stack property listing platform with core features including listing creation, editing, deletion, and image uploads.
- Integrated MapBox API for interactive geolocation maps on each property listing page, enhancing user experience with dynamic map rendering.
- Implemented MVC architecture with Express.js routing and EJS server-side templating, ensuring clean separation of concerns and maintainable codebase.
- Handled multi-image uploads with Multer and persisted structured data using Mongoose ODM with MongoDB Atlas cloud database.
- Live Demo | GitHub

KEY ACHIEVEMENTS

Full Stack Developer (Self-directed Projects) 2025 – Present

Independent Remote

- Architected and shipped 2 end-to-end web applications from concept to cloud deployment with zero downtime on Render.
- Implemented industry-standard security practices including hashed passwords, JWT tokens, and protected API routes across projects.
- Designed and consumed RESTful APIs following best practices for HTTP methods, status codes, and JSON response structures.
- Maintained version-controlled codebases on GitHub with structured commit history, demonstrating collaborative development readiness.

EDUCATION

Bachelor of Computer Applications (BCA)

2022 – 2024

Shri Khushal Das University Hanumangarh, Rajasthan
CGPA: 7.0
