

Harkit Singh

Full Stack Developer (MERN)

+91-8890436710 | harkitsinghsran9584@gmail.com | [Portfolio](#) | [Linkedin](#) | [Github](#) | Rajasthan, India

SUMMARY

Full Stack (MERN) Developer with hands-on experience building, containerizing, and deploying scalable web applications. Skilled in React.js, Node.js, Express.js, MongoDB, Docker, Kubernetes, and CI/CD pipelines. Experienced in designing secure RESTful APIs, implementing JWT authentication, configuring NGINX Ingress, and managing cloud deployments. Strong understanding of scalable backend architecture, container orchestration, and modern DevOps practices.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), HTML5, CSS3, SQL, Java (DSA)

Frontend: React.js, Bootstrap, Tailwind CSS, Material UI, Formik, EJS

Backend: Node.js, Express.js, REST API Design, JWT Authentication

Databases: MongoDB, Mongoose ODM, SQL

Cloud & DevOps: Docker, Kubernetes, NGINX Ingress, GitHub Actions, CI/CD, Render, Vercel, Netlify, Cloudinary, Git, GitHub

Tools: VS Code, ThunderClient, Terminal, MapBox API, Multer

Concepts: MVC Architecture, REST APIs, CRUD Operations, Responsive Web Design, Authentication Authorization, Containerization, Kubernetes Orchestration, Ingress Routing

PROJECTS

Boutique Website | *MERN, JWT, Cloudinary, Multer*

Jan 2026 – March 2026

- Developed a full-stack e-commerce platform with 5+ core modules: authentication, products, cart, reviews, and profile
- Built a secure authentication system with password reset flow, improving account recovery reliability
- Integrated Cloudinary for optimized cloud-based media storage.
- Engineered a dynamic cart system with real-time updates for a smooth, responsive user experience
- Designed a fully responsive UI for mobile, tablet, and desktop devices
- [Live Demo](#) | [Github](#)

AI Assistant | *MERN, Docker, Kubernetes, OpenAI API, JWT*

March 2026 – May 2026

- Built a full-stack ChatGPT clone with multi-turn conversations, persistent chat history, and thread management using React, Node.js, and MongoDB
- Implemented JWT authentication with protected API routes for secure user sessions
- Containerized frontend and backend applications using Docker and created production-ready Dockerfiles for consistent deployments
- Deployed the application on Kubernetes using Deployments, Services, Secrets, and NGINX Ingress Controller for traffic routing and load balancing
- Configured Kubernetes Secrets for secure management of MongoDB URI, JWT Secret, OpenAI API Key, and environment variables
- Implemented GitHub Actions CI/CD workflow for automated build, testing, Docker image creation, and Kubernetes deployment
- Built a responsive UI with React Context API and Markdown rendering with syntax-highlighted code blocks for AI responses
- [Live Demo](#) | [Github](#)

- Developed a full-stack property listing platform replicating core Airbnb features including listing creation, editing, deletion, and image uploads.
- Integrated MapBox API for interactive geolocation maps on each property listing page, enhancing user experience with dynamic map rendering.
- Implemented MVC architecture with Express.js routing and EJS server-side templating, ensuring clean separation of concerns and maintainable codebase.
- Handled multi-image uploads with Multer and persisted structured data using Mongoose ODM with MongoDB Atlas cloud database.
- Built a GitHub Actions CI/CD pipeline with automated Jest tests running against a live MongoDB service container, uploading coverage reports as artifacts on every run.
- Implemented test-gated production deployments to Vercel via Vercel CLI (`pull` → `build` → `deploy`), ensuring broken builds never reach production.
- [Live Demo](#) | [Github](#)

KEY ACHIEVEMENTS

Full Stack Developer (Self-directed Projects)	2025 – Present
<i>Independent</i>	<i>Remote</i>
• Built and deployed 3+ full-stack applications with 99% uptime on cloud platforms • Implemented security practices including bcrypt password hashing, JWT authentication, and protected API routes • Designed RESTful APIs following best practices, improving API reliability and debugging efficiency • Maintained clean, version-controlled repositories with structured commit history on GitHub • Solved 100+ DSA problems in Java to strengthen algorithmic problem-solving skills	

EDUCATION

Master of Computer Applications (MCA)	2025 – Present
<i>Shri Khushal Das University, Hanumangarh</i>	<i>CGPA:7.6/10</i>
Bachelor of Computer Applications (BCA)	2022 – 2024
<i>Shri Khushal Das University</i>	<i>Hanumangarh, Rajasthan</i>
